

Family Centered Treatment

an evidence-based and well-supported trauma treatment model of home-based family therapy.

A home-based treatment to stabilize youth & families who have experienced trauma, and those experiencing complex mental health symptoms. The goal being to eliminate out of home placements and higher levels of care.

The family is empowered to set and achieve their own goals, with treatment intensity and duration customized to meet each unique family's needs. FCT is a four phase process that treats the family as a single unit - not as individuals.

HIGHLIGHTS*

*FYTD 2023/2024

100%

CLIENT SATISFACTION

94%

OF YOUTH DO NOT NEED A HIGHER LEVEL OF CARE

100%
